

Date	Discussion
January 15	<ul style="list-style-type: none"> - Potential Project ideas; weather app, talk bot and old video game - Who will find a customer - Maybe customer should be a york student - Github repository created
January 16	<ul style="list-style-type: none"> - New idea, application that finds the nearest food places/restaurants on campus and display information on each of them, like reviews, food options, etc - Write email and send on the 17th
January 23-24	<ul style="list-style-type: none"> - Customer has been established - Talks about stories - Customers wanting features like dietary restrictions, prices, reviews, etc
January 27	<ul style="list-style-type: none"> - Assign all incomplete tasks/deliverables - Stories are finalized - Vision statement completed
January 29	<ul style="list-style-type: none"> - Customer meeting completed and recorded
February 1	<ul style="list-style-type: none"> - Everyone picks the user stories they will complete - Basic Search Functionality(Brian), Dietary Restriction Filters (Yazan), User Review System (Neel), User Registration and Profile (Abhiroop), Portion & Value (Abeed), Saving my favorite places (Jason)
February 5	<ul style="list-style-type: none"> - Go over individual progress - Ensure work is being done as planned - Rough check over current code, helped each other/answered and asked questions - Abhiroop not appearing on Github, fix issue
February 7	<ul style="list-style-type: none"> - Talks about storing data, what type of

	database should we use
February 14	<ul style="list-style-type: none"> - Reviewed work done to ensure we are on track to upload on time for iteration 1 - Everyone seems to be on track. - Abhiroop added to github
Development of Tasks (Time spent)	
Basic Search Functionality(Brian)	51/2 hours (Code + Testing)
Dietary Restriction Filters (Yazan)	5 hours (Code + Testing)
User Review System (Neel)	5 hours (Code) 1 hour (testing)
User Registration and Profile (Abhiroop)	4 ¾ hours of code, 2 hour testing
Portion & Value (Abeed)	4 hours of coding and 30 minutes of testing
Saving my favorite places and User Login (Jason)	~5 hours (Code + Testing)
February 20th	<p>Everyone picks out the user stories and tasks they will complete</p> <ul style="list-style-type: none"> - Feedback System (Neel) - Saving my favourite places(Jason) - Portion and Value (Abeed) - Discounts on Food (Yazan) - Dietary Log Feature (Brian) - More customer information and editing the GUI (Abhiroop) - Also managing and fixing up the previous log in user story (Abhiroop)
February 28th	<ul style="list-style-type: none"> -Video Complete -Go over individual progress and everyone is almost complete everything in terms of the back end - everyone is also almost done the testing - GUI , UML and overall combination of database is left

March 4th	<ul style="list-style-type: none"> - We have finished the UML and combined the back end and finished testing - Half way there in terms of GUI - Location in the SQL of all the databases has been added as per the professor recommendations
March 9th	<ul style="list-style-type: none"> - We have finished all the GUI components and combined them and have done revised vision statements as well
March 11th	<ul style="list-style-type: none"> -Submitted everything for itr2 on Github - Finished the Group log report everyone did a great job and had equal importance
Feedback System (Neel)	3.5 hours (coding +Testing)
Saving my favourite places (jason)	3 hours (coding+Testing)
Portion and Value (abeed)	5 hours (coding +Testing)
Discounts on Food (Yazan)	4 hours (coding +Testing)
Dietary Log feature (Brian)	3 hours (coding +Testing)
Video making editing log in GUI (abhiroop)	4 hours (coding + Testing)
