

## **Iteration 2 detailed user story:**

Title: Feedback System (Neel)

Description: As a frequent user of the hungry lions app I would like to provide feedback on the functionalities of them system. Incase there are some glitches on the app or I would want there to be certain features on the app that have not already been implemented yet. I need there to be some sort of communication between the makers and owners of the app.

Questions: What mechanisms should we use to get feedback from the users themselves for our app?

Priority: Medium

Story Points: 5

Title: Saving my favourite places (Jason)

Description: As a student and user of this app, I want to be able to save my favourite spots on my account so that I can easily access and view these restaurants again without having to find them again. This way, whenever I want food I can look for peek times and more without having the hassle of searching for it again.

Question: What features should be integrated into the "Saving my Favourite Places" function to ensure user convenience? Should we consider customization options such as putting saved places in categories?

Priority: High

Story points: 7

Title: Portion & Value (Abeed)

Description: As a student on campus, money is hard to come by. I want to make sure that the food I get on campus is worth the money and that the portion sizes are respectable and can at least last me for a couple of hours.

Question: What metric can we use to best measure the value of a meal? Should we use quantity or price or a mixture of both? Maybe a ratio?

Priority: Medium

Story points: 5

Title: Discounts on Food (Yazan)

Description: As a frequent commuter on campus, I often have to eat on campus if I'm staying longer than 5 hours from the morning to the afternoon. Packing my own food may not be feasible for me if I have to go early. Hence, I like to cook my own food first and then come to campus for later classes. I wish I could cut some expenses for food, along with my commuting and tuition fees.

Question: How can we implement a fair and least exploitable point system that rewards on-campus York students, faculty, and staff for frequently buying and eating at campus dining places?

Priority: High  
Story Points: 7

Title: Dietary Log Feature (Brian)

Description: As a health conscious individual, I want to log and track my daily dietary intake within the app. This feature will allow me to input the foods I consumed throughout the day, such as meals and snacks. This could help me track my calories or other things that I need to track and can help ensure I meet my dietary goals.

Question: What nutritional metrics should be included in the dietary log? Should there be external apps or databases for easier tracking?

Priority: Medium  
Story Points: 6

Title: Edit log in GUI (Abhiroop)

Description: To make the GUI include more information when entering such as discount offers , restaurants in York . How the website benefits you if you make an account and why you should join our team

Question: What improvements can be made to the log in page so that the customers can get attracted to make an account?

Priority: Medium  
Story Points: 6
